Professional Summary

Highly motivated and results-oriented AI/ML professional with a passion for developing innovative solutions to complex problems. Proven ability to design, train, and deploy machine learning models, demonstrated through practical projects and freelance experience. Possessing a strong foundation in statistical analysis and artificial intelligence, coupled with excellent problem-solving skills. Eager to contribute to a dynamic team at Siemens Digitalization Technology and Services, leveraging expertise in data analysis, model optimization, and pipeline development to drive impactful outcomes.

Key Skills

- * **Artificial Intelligence (AI):** Expertise in various AI techniques, including machine learning and deep learning.
- * **Machine Learning (ML):** Proficient in supervised and unsupervised learning algorithms.
- * **Statistical Analysis:** Strong analytical skills with a solid understanding of statistical methods.
- * **Python:** Highly skilled in Python programming for data manipulation, model development, and deployment.
- * **Data Manipulation:** Experienced with data manipulation tools like Pandas and NumPy.
- * **Problem Solving:** Adept at identifying, analyzing, and resolving complex problems using data-driven approaches.
- * **Software Engineering:** Solid understanding of software engineering principles and version control (Git).
- * **RAG System:** Experience with Retrieval-Augmented Generation for knowledge base creation and information retrieval.

Education

Master of Science (M.Sc.) in Artificial Intelligence & Machine Learning

Christ University, Bengaluru

Jun 2023 – May 2025

Bachelor of Science (B.Sc.) in Computer Science, Mathematics, Electronics

Christ University, Bengaluru

Jun 2020 – Jun 2023

Experience

Freelancer | May 2025– Present (6 months)

- * Independently developed and deployed AI/ML solutions for diverse projects, demonstrating practical application of skills.
- * Managed project timelines and deliverables, ensuring high-quality results.
- * Adapted to evolving project requirements and communicated effectively with clients.

Conversation Designer Intern | Comportement Software Private Limited | Jan 2025 – May 2025 (4 months)

- * Contributed to the development of conversational AI applications, gaining experience in natural language processing (NLP).
- * Assisted in data analysis and model training, supporting the development of intelligent chatbots.
- * Collaborated with team members to improve the performance and usability of conversational AI systems.

Key Projects

Eva-AI-Job-Butler | Personal Intelligent Assistant |

- * Developed a personal AI assistant leveraging a Retrieval-Augmented Generation (RAG) system.
- * Created a personalized knowledge base by ingesting resume details and dynamically fetching latest work from github.
- * Designed a user-friendly interface for automated job search, demonstrating skills in AI and user experience.

Portfolio | Interactive Showcase |

- * Built a dynamic web platform using Streamlit to showcase expertise, projects, and

professional journey.

- * Demonstrated proficiency in creating user-friendly interfaces and dynamic web content.
- * Designed a visually appealing and easy-to-navigate portfolio to highlight skills and experience.

Machine_Learning_Projects | GitHub Repository |

- * Developed a repository containing .ipynb files and programs for experimenting with various machine learning algorithms.
- * Analyzed model performance and extracted insights from data, demonstrating understanding of ML lifecycle.
- * Showcased the ability to apply machine learning techniques to solve real-world problems.
